01 - WHAT IS IT

WHAT IS AUDIOXL DRUMS?

A 16-step drum machine with eight synthesised voices, a sampler and an effects rack.

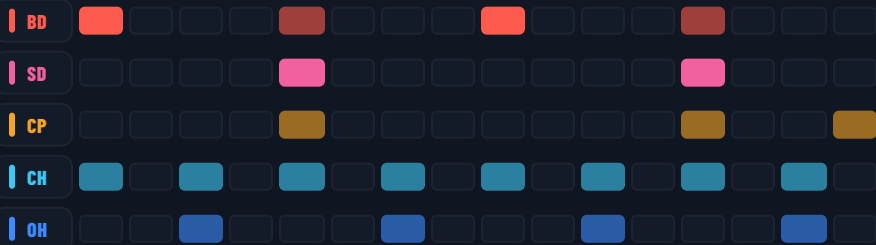

8

VOICES, SYNTH OR SAMPLE

Each voice is an analogue-style synthesis engine or a sample – and they mix freely: a sampled 909 kick with a synthesised 808 snare.

| BD | SD | CP | CH | OH | LT | RS | CY

| + SAMPLE

145

KITS

77 synth kits and 68 sampled machines.

136

GROOVES

In 28 genre folders, each with kit and effect profile.

3469

SAMPLES

From 68 real machines, 14 brands.

8

RACK MODULES

On the master bus, 12 profiles.

02 - THE SEQUENCER

REST, HIT, ACCENT.

SEQ A B C D

Four chainable sequences – **CHAIN 1-4**, **STEPS 1-16**: four × 12 steps = a 48-step loop.

SWING

50 % straight to 75 %; **66.7 %** is exactly triplet.

ACCENT

How far an accent stands out – like the knob on a TR.

TIMING

Follows the host **sample-accurately**; INTERNAL tempo when stopped.

UNDO

64 steps, covering everything. A whole groove load = one undo.

HARDWARE FEEL

The closed hat **chokes** the open one, as on a real machine.

VOICES

BD · KICK

(∞)

03 - SYNTHESIS ENGINE

NINE KNOBS, ONE LAYOUT

Your hand learns where DECAY is – and finds it on every instrument.

I BD	kick	TUNE	DECAY	CLICK	BEND
I SD	snare	TUNE	DECAY	TONE	SNAP
I CP	clap	TONE	DECAY	WIDTH	SPREAD
I CH/OH	hat	TUNE	DECAY	HPF	NOISE
I LT	tom	TUNE	DECAY	SKIN	BEND
I RS	rim	TUNE	DECAY	RES	NOISE
I CY	cymbal	TUNE	DECAY	HPF	NOISE

then on every voice: DRIVE · LEVEL · PAN · REVERB · DELAY

KICK

sine + pitch envelope + click

SNARE

body + filtered noise

CLAP

three banded reflections

HATS & CYMBALS

six square waves in 808 ratios

RIM

impulse through a resonant filter

Real synthesis, not samples. No library needed to play.

SAMPLER

SAMPLE · TR-909

(∞)

04 - SYNTH OR SAMPLE

TWO VERSIONS OF EVERY MACHINE

The synth engine, tuned – and the real machine, sampled.

SAMPLE MODE

PITCH ± 24 semitones · DECAY · FILTER LP
↔ HP · START.

ANY FILE

wav, aif, mp3, flac, ogg – or drag it
straight onto the row.

NEVER LOST

Back to SYNTH, the sample stays in
memory: one click brings it back.

COLOUR

A conversion stage per voice – or
MASTER, the rack's model.

3469 SAMPLES, ONE SEARCH BOX

68 MACHINES, 14 BRANDS

| ROLAND | BOSS | ALESIS | CASIO | KORG | YAMAHA | OBERHEIM | E-MU
| LINN | SIMMONS | AKAI | ACETONE | ELEKTRON | BUCHLA

NAMED BY INSTRUMENT

TR-808 SNARE 03 — never the pack seller's file name. Hats are ordered by **degree of opening**: closed takes the shortest, open the longest.

FROM ANY DRIVE

Installs anywhere, external drive included — the plugin finds it. Add your own **Brand/Machine/sample.wav** and press RESCAN.

TR-909 HAT 01

One click auditions on a utility voice — outside the rack, off the eight tracks. **LOAD** or double-click applies it.

MASTER FX

RACK · ON

(∞)

06 - THE EFFECTS RACK

EIGHT MODULES ON THE MASTER

TRANSIENT

ATTACK · SUSTAIN — bipolar

MACHINE

Classic converters: bits, rate, bandwidth

DRIVE

Tape · tube · clip · fold

FILTER

LP · HP · BP, CUTOFF, RESO

COMP

With a reduction meter, MIX

DELAY

Synced or free, stereo → ping-pong

SEND

REVERB

SIZE · DAMP · PREDLY · WIDTH

SEND

MASTER PRESET

12 profiles, one click

INSERTS VS SENDS

Transient, Machine, Drive, Filter and Comp work on the whole mix. **Delay and Reverb are returns:** they come back after the chain, so it doesn't colour them twice.

SYNC

MASTER RACK · LINKED

(∞)

07 - AUDIOXL SUITE

ONE CHAIN, TWO PLUGINS

Hand the whole rack to AudioXL Master Rack with one switch.

EITHER SIDE

SYNC MASTER RACK here, SYNC DRUMS there: same switch.

AS IT STANDS

Seven modules travel with values and menus – and bypass here.

VOICES STAY

Per-voice REVERB, DELAY, DRIVE, CLICK stay on each track.

SAFE

Sync off: everything goes back. Rack gone? Back in 1.5 s.

STATE 1

SEPARATE

Each on its own.

STATE 2

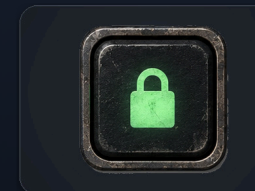

WAITING

On – the link engages when the other arrives.

STATE 3

HANDED OVER

Master Rack colours the mix.

EXPORT

BOUNCE · STEMS

(∞)

08 - OUTPUT

FROM GROOVE TO STEMS

BOUNCE IN PLACE

STEMS

One file per sounding voice, plus the mix. Loops, tail, mute/solo – and **two mixes: with the rack and without.**

WITH RACK

WITHOUT RACK

MIDI OUT

MIDI

The eight voices play another machine on the channel you choose. **Accent travels as velocity**; every note on is turned off again.

LICENCE

10 min

Full demo, counted in minutes of actual work. Then the sound stops – **the work doesn't**. One serial, **AXD-...**, unlocks at once.
