01 - WHAT IS IT

WHAT IS MOTION FX?

An effect that moves your sound in time – filter, volume and pan, driven by sequenced lanes.

THREE MODULES IN PARALLEL

Filter (SVF, log sweep), Volume (rhythmic gating) and Pan (tempo-synced stereo sweep) – plus drive, noise, an FX rack, granular and beat repeat.

SELF-CONTAINED

A preset resets the whole tree – modules, envelopes, lanes, beat-repeat grid. **Nothing leaks** from the previous patch.

RND EVERYWHERE

Each section has its own dice and **Seed Lock**; **ALL RND** rolls everything, avoiding clashes on the same target.

UNDO ANYTHING, **HURT NOBODY**

UNDO / REDO

1=1

One knob turn, one preset (~150 parameters), one ALL RND across ten modules: **one undo step each**. Loading a preset never wipes your history.

OUTPUT CEILING

2× · 4×

Transparent up to **2× full scale**, a knee that **never exceeds 4×**. No parameter combination can slam your monitors.

ACTIVATION

10 min

Full demo on the machine, then stand-by. One serial **AXLM-...** unlocks VST3, AU and Standalone together – and survives updates.
